Dear FCC Members, I have recently learned about NAB's petition 04-160 to stop satellite radio from broadcasting instant traffic and weather and I need your help. The content broadcast on satellite radio, particularly XM Satellite Radio, is content the subscribers want and pay to utilize. The FCC's intervention on this matter is not needed as the competition for regular broadcasters will be good for quality improvement.

As I am sure you understand, competition is the driving force behind America's success. I would greatly appreciate it if you would reject the NAB's petition 04-160 and allow competition to continue for the improvement of radio broadcasting.

Millions of Americans have subscribed to satellite radio and should be allowed to enjoy their first amendment rights without governmental interference.

Your support in this matter would be greatly appreciated.

Sincerely,

Michael & Lorie Roever
